Backend Engineer

Experience

Northstar Demo Systems - Backend Engineer

January 2022 - December 2025

Built Go services for an internal order-processing platform.

Implemented PostgreSQL transactions and an idempotency-key table to prevent duplicate order creation during client retries.

Containerized services using Docker and maintained local development and staging configurations.

Investigated slow reporting queries using EXPLAIN ANALYZE and added indexes after reviewing query plans.

Projects

Reliable Order API

Implemented request validation, idempotency, integration tests, and structured error responses in Go and PostgreSQL.

Deployment Practice Lab

Completed a personal three-month Kubernetes learning project.

Used Deployments, Services, and basic health probes.

No production Kubernetes ownership claimed.

Skills Claimed

Go - approximately four years

PostgreSQL - approximately three years

Docker - approximately two years

Kubernetes - beginner project exposure

Certifications: None claimed.
